

Aimé Bonpland (1773 – 1858)

Description des plantes rares cultivées à Malmaison et à Navarre. [Extract]

© No copyright (Public domain)

After Bonpland returned from the expedition to South America with Humbolt, he obtained a position as botanist to the Empress Joséphine. Many exotic plants were then imported to *chateau de la Malmaison* and *chateau de Navarre* (Close to *Évreux*). In 1813, together with Pierre-Joseph Redouté, he published this series of 64 plates, of which 2 represent cacti and 1 a cotyledon.
