

International Code of Botanical Nomenclature (ICBN) -In French

 Under copyright (with permission)

You need to know why a plant name is “*naked*” (nomen nudum), why the “*combination is invalid*”, why a name has “*priority*”? Then, read the electronic version of the code at [International Code of Botanical Nomenclature](#) (Saint Louis code, 1999). Sorry, the english version cannot be downloaded.

Conversely, you may download an official french translation: [CodeNomenFr.pdf](#) (0,4Mo; 2008-12-05). You must comply with the rules (in french!) defined by [tela-botanica](#) to use this file. ¹⁾

The last issue of the code (2018, Shenzhen) can be read [here](#)
