

Josef Nelson Rose 1862-1928

Notes on useful plants of Mexico.

 No copyright (public domain)

This article was published in 1899 in *Contributions from the United States National Herbarium*, vol. 5, No 4. It deals with many genera and species, including Cacti, Agave, Yucca, etc. and their use as food, beeverage, medicine, soap, fibers, fence, brush, etc. Illustrated by many B&W plates of the nineteenth century, this is a very interesting document half way between botany and anthropology.

- A pdf file containing both the original and interpreted text (p. 209-259) can be downloaded as [mobot39088011696697.pdf](https://www.biodiversitylibrary.org/item/11696697) (179 MB)¹⁾, which is hosted by the [Biodiversity Heritage Library \(BHL\)](https://www.biodiversitylibrary.org/). Visit this library to find more books and to know their copyright rules (clik the “copyright” tab)

NB: A short note on Agave is found p. 151-157.

Right: Pulque plant or Maguey (*Agave atrovirens* Kar.)
