

# Joseph Gerhard Zuccarini (1797-1848)

## Plantarum novarum vel minus cognitarum quae in horto botanico herbarioque regio monacensi servantur

© No copyright (public domain)

This set of 3 articles by Zuccarini contains several new descriptions and the birth certificate of the *Echinopsis* genus in 1837. These papers were published in *Abhandlungen der Mathematisch-physikalische Klasse der Königlich Bayerischen Akademie der Wissenschaften* (Proceedings of the Mathematical-physical class of the Royal Bavarian Academy of Sciences). They are written in (old) German and the plant descriptions are in Latin. There are 6 B&W plates that have been cleaned in the files proposed below.

These files are made from a facsimile edition dated 1985 and printed in Germany with no copyright mention other than "nur für den persönlichen und beruflichen Gebrauch" (for personal and professional use only), and from the raw plates downloaded from the Biodiversity Heritage Library (BHL) web site where a complete set of Zuccarini papers, including plants other than succulents can be found at: <http://www.biodiversitylibrary.org/item/38451#page/1/mode/1up><sup>1)</sup>

- **Read online in the [reading room](#)**

- **Download:**

- Interpreted file: [Zuccarini\\_Plantarum.pdf](#) (4.2MB; 2010-10-12)
- Original file: [Zuccarini\\_Plantarum\\_O.pdf](#) (53,2MB; 2010-10-12)

<sup>1)</sup>

The third fascicle of the BHL edition has a different page numbering
